The campers will interact with all age groups throughout the day. Camp days will be completely free choice based, though they will be supported to step outside of their comfort zone. They will ultimately be learning the power of decision making and forming choices beneficial to their personal growth. Throughout the summer, the participants can expect water games, exploration and organized special events including a talent show, a penny carnival, video game bus, visits from special guests and much more! We will be holding two novice sessions, which will primarily focus on learning how to build basic bots and program them to move in a variety of ways to reach certain goals. This would be recommended for newcomers, and those who simply love to build and program. Our one advanced session will incorporate specialized touch, light, and ultrasonic sensors, using their readings in our programming to complete more complex missions. We recommend this for students with previous Mindstorms experience. ***Participants will need a bagged lunch, sunscreen, snacks & water each day of camp.***

Most of our camps are taught by certified teaching pros and college tennis players. Many of our campers have gone on to play college tennis at schools like Harvard, Wheaton, Penn State, U. of New Hampshire, N.Y.U., Colby, U.S.M., Conn.
